

Professional Licensure Disclosures

Federal regulations require institutions to disclose whether programs designed or promoted as leading to professional licensure or certification meet the educational requirements established by each state.

Licensure requirements vary by state and territory and are subject to change. While the University has made reasonable efforts to determine whether its programs meet educational requirements for licensure, it does not guarantee that completion of any program will result in licensure or certification. Students are responsible for verifying licensure requirements in the state or territory where they intend to practice.

In accordance with 34 CFR 668.43(a)(5)(v), institutions must indicate whether completing a program designed to meet the educational requirements for a specific professional license or certification is sufficient to fulfill state regulations. This includes disclosing:

1. The states in which the program's curriculum meets the educational requirements for licensure or certification.
2. The states in which the program's curriculum does not meet the educational requirements.

In compliance with 34 CFR 668.43(c), institutions must directly notify both current and prospective students regarding the alignment of their programs with state licensure or certification requirements.

Current Students:

If a program's curriculum no longer meets the educational requirements for licensure or certification in a state where an enrolled student is located, the institution must inform the student within 14 calendar days of making such a determination.

Prospective Students:

If it is determined that a program's curriculum does not meet the educational requirements for licensure or certification in a state where a prospective student is located, the institution must notify the student before enrolling in the program. For additional details regarding educational requirements, current and prospective students are encouraged to visit their program's website.

Academic Programs-Miami Campus

Bachelor of Arts in Elementary Education

Completion of this program does not guarantee licensure or certification. Additional requirements may apply, and students are responsible for verifying licensure requirements in the state or territory where they intend to practice.

Bachelor of Science in Psychology

Federal regulations require institutions to disclose whether completion of a program is sufficient to meet the educational requirements for professional licensure or certification in each state.

In accordance with 34 CFR 668.43(a)(5)(v), the University provides the following disclosure regarding professional licensure:

This academic program is not designed or promoted as leading to professional licensure or certification.

Completion of this program does not require a professional license or certification for employment in the related occupational field.

Therefore, no state licensure determination is required for this program.

Bachelor of Science in Psychology (Taught in Spanish)

Federal regulations require institutions to disclose whether completion of a program is sufficient to meet the educational requirements for professional licensure or certification in each state.

In accordance with 34 CFR 668.43(a)(5)(v), the University provides the following disclosure regarding professional licensure:

This academic program is not designed or promoted as leading to professional licensure or certification.

Completion of this program does not require a professional license or certification for employment in the related occupational field.

Therefore, no state licensure determination is required for this program.

Bachelor of Science in Cyberpsychology

Federal regulations require institutions to disclose whether completion of a program is sufficient to meet the educational requirements for professional licensure or certification in each state.

In accordance with 34 CFR 668.43(a)(5)(v), the University provides the following disclosure regarding professional licensure:

This academic program is not designed or promoted as leading to professional licensure or certification.

Completion of this program does not require a professional license or certification for employment in the related occupational field.

Therefore, no state licensure determination is required for this program.

Bachelor of Science in Sports Psychology, Technology, and Performance Optimization

Federal regulations require institutions to disclose whether completion of a program is sufficient to meet the educational requirements for professional licensure or certification in each state.

In accordance with 34 CFR 668.43(a)(5)(v), the University provides the following disclosure regarding professional licensure:

This academic program is not designed or promoted as leading to professional licensure or certification.

Completion of this program does not require a professional license or certification for employment in the related occupational field.

Therefore, no state licensure determination is required for this program.

Bachelor of Science in Language and Behavioral Disorders

Federal regulations require institutions to disclose whether completion of a program is sufficient to meet the educational requirements for professional licensure or certification in each state.

In accordance with 34 CFR 668.43(a)(5)(v), the University provides the following disclosure regarding professional licensure:

This academic program is not designed or promoted as leading to professional licensure or certification.

Completion of this program does not require a professional license or certification for employment in the related occupational field.

Therefore, no state licensure determination is required for this program.

Bachelor of Business Administration in Behavioral Business and Innovation Technologies

Federal regulations require institutions to disclose whether completion of a program is sufficient to meet the educational requirements for professional licensure or certification in each state.

In accordance with 34 CFR 668.43(a)(5)(v), the University provides the following disclosure regarding professional licensure:

This academic program is not designed or promoted as leading to professional licensure or certification.

Completion of this program does not require a professional license or certification for employment in the related occupational field.

Therefore, no state licensure determination is required for this program.

Bachelor of Science in Behavioral Intelligence and Analytics

Federal regulations require institutions to disclose whether completion of a program is sufficient to meet the educational requirements for professional licensure or certification in each state.

In accordance with 34 CFR 668.43(a)(5)(v), the University provides the following disclosure regarding professional licensure:

This academic program is not designed or promoted as leading to professional licensure or certification.

Completion of this program does not require a professional license or certification for employment in the related occupational field.

Therefore, no state licensure determination is required for this program.

Master of Science in Counseling (Online)

Completion of this program does not guarantee licensure or certification. Additional requirements may apply, and students are responsible for verifying licensure requirements in the state or territory where they intend to practice.

Master of Business Administration (M.B.A.) in Healthcare Management (Online)

Federal regulations require institutions to disclose whether completion of a program is sufficient to meet the educational requirements for professional licensure or certification in each state.

In accordance with 34 CFR 668.43(a)(5)(v), the University provides the following disclosure regarding professional licensure:

This academic program is not designed or promoted as leading to professional licensure or certification.

Completion of this program does not require a professional license or certification for employment in the related occupational field.

Therefore, no state licensure determination is required for this program.

Master of Science in Industrial/Organizational (I/O) Psychology

Federal regulations require institutions to disclose whether completion of a program is sufficient to meet the educational requirements for professional licensure or certification in each state.

In accordance with 34 CFR 668.43(a)(5)(v), the University provides the following disclosure regarding professional licensure:

This academic program is not designed or promoted as leading to professional licensure or certification.

Completion of this program does not require a professional license or certification for employment in the related occupational field.

Therefore, no state licensure determination is required for this program.

Doctor of Psychology (Psy.D.) in Clinical Psychology

This program is accredited by the American Psychological Association (APA) and is designed to meet the educational requirements for licensure in Clinical Psychology. Additional requirements may apply, including supervised training and examinations, as well as approval by the applicable licensing authority.

Completion of this program does not guarantee licensure or certification. Additional requirements may apply, and students are responsible for verifying licensure requirements in the state or territory where they intend to practice.
